Multidimensional bibliometric indicator to identify top players

Global Tech Mining Conference Power Talk

October 17, 2019

Rebecca Jansen, Maude Lethiecq-Normand and Erica Wiseman

What is this indicator?

Aggregation of 5 research dimensions available in SciVal:

- Volume
- Collaboration
- Impact
- Prestige
- Usage

Provides a more level playing field to rank research excellent

- Those with highest volume of research rarely rank highest

Strengths of the multidimensional indicator

To identify 'top players' via quality of research not quantity of research

- Does not focus on large organizations or established researchers

To identifying strong potential collaborative partners

- Identifies reputable researchers or smaller organizations who produce high quality work with a tendency to work collaboratively on an international scale.

To identify 'hidden gems' or 'rising stars'

- Identifies researchers or organizations that have produced a very respectable amount of high quality collaborative research that might otherwise go unnoticed
